Section 2I. Required consultation or coordination between the lead agency and/or the RFO and another governmental unit including tribes:

Easements, permissions, or permits:

Required: Access permission (St. Tammany has 60' corridor access); CWA permit (COE); Water Quality Certification (LDEQ);

Eight State and/or Federal Species are listed in St. Tammany Parish. The only one that may occur in this area is the Louisiana Quillwort as indicated on the 'Species of Conservation Concern' Map. USFWS/LDWF consultation is required.

Mitigation Description:

Debris will be removed from the riverbed area with an amphibious trackhoe and barge and taken to an approved landfill. Action will be completed without interruption.

Some existing, water-logged debris left in the channel is preferred/acceptable. Only dead/new debris is to be removed. No live trees within the stream bed should be cut.

The proposed action is the preferred alternative. The proposed action is the least costly alternative that achieves the restoration objectives, maximizes environmental benefits and is socially acceptable.

Agencies, persons, and references consulted, or to be consulted:
